

GEM FARMERS ARE PLANTING FRUIT TREES

Success With Currants, Raspberries, and Strawberries Encourages Farmers to Try Apples, Plums, and Other Fruit Bearing Trees

GEM, May 8.—A large percentage of our Gem farmers are planning to have their own orchards in the near future, as quite a large number of fruit trees have been shipped in from Calgary and Brooks nurseries. Apple trees of the Wealthy variety, plums, and cherry trees have been planted on the Rumble and Williams farms, and also on the C. P. R. farm. Currants of all varieties, strawberries, and raspberries have been successfully grown here in the past few years, and here's hoping our fruit crop will equal our grain crop, if not in size perhaps in quality.

Mrs. C. Portney and Gladys were Thursday afternoon callers on Mrs. Maguire.

The latest news of C. Jones and Mrs. Jones of Wintering Hills, is that their wheat crop is well above the ground.

S. Lawrie, executive agent, and F. Williamson, president, of the Community Club, are doing good work visiting among our new settlers in the southern part of the Colony. S. Lawrie is interesting them in Wheat Pool problems, and F. Williamson in the Community Life of Gem. Many have signed up as Wheat Pool members.

Mr. and Mrs. W. Peake made a visit to Walter's parents during the past week. They live across the river in the Hand Hills or Lone Butte district. They rode both ways.

Don't forget the big community meeting on Friday night, May 10th, in the Gem school. Business, balance sheet for 1928 picnic, and election of officers for 1929. After the business of the meeting is completed an ice cream social will be held. A heavy invitation is extended to be present and help by your presence to aid in making all community efforts a success. A little appreciation and a little more co-operation please. Refreshments served free.

Last Friday night several guests attended the Lathum dance accompanying our Gem "Peppy Four Orchestra."

Royal Burrows was a Tuesday caller on Fitch Williamson.

F. Williamson spent Sunday on the Leslie Douglas ranch.

Mrs. Peck left Bassano on Saturday last for B. C. and later will go north.

Miss M. Waldron spent a pleasant week-end with Mrs. Jay Fryberger on the Houghton ranch near the river.

Mr. and Mrs. Basil Benjamin have taken up their residence on the old Marquess farm home, and are "at home" to their numerous friends any old time after school hours and dragnite hours.

Mrs. Vilet Br. was a Friday afternoon caller on Mrs. E. Small.

A heavy frost occurred here on Monday and Tuesday nights, covering

Countess News

COUNTRESS, May 8.—Max Gamble shipped his goats to Calgary on Wednesday.

Mr. Erickson, of Bassano, spent Sunday visiting at the H. Cowen home.

Mr. and Mrs. J. Newman were callers at the Mullick and Sloan homes on Sunday.

Mrs. E. R. Heldt was on the sick list last week.

Mrs. P. T. Smith and Mrs. W. M. Anderson spent Tuesday afternoon with Mrs. Sloan.

Caryl Gamble spent the week-end at Glen, visiting Miss Gladys Portney.

Mrs. and Mrs. Howard Ferguson, Mrs. D. Ferguson, and Mrs. Mack Ferguson went to Gem Tuesday for the day.

Mrs. C. A. Sloan entertained some friends Tuesday afternoon at bridge.

Baseball Club Warming Up For The Season

Hope to Join the Bow Valley League

After the first work-out last Sunday afternoon the Bassano baseball aggregation begins to assume the semblance of a real ball team.

Twenty ball players turned out for their first swing of the bat, and the boys showed up very good for the first of the season.

The team will be strengthened this season by the addition of Corby Hornquist, who plays behind the bat, Yankee Plante, who is expected to play, also Arlie Simpson, Lloyd Roach, Jakey Bulmer, Leo Newby, Harold Runquist, Geo. LaPage, and Earl Marquard.

The club hopes to join the Bow Valley League, which now includes Quatrevoies, Arrowwood, and Carleton Place.

A double header ball game is booked for Monday, June 10th, when a traveling negro professional team is coming with a carnival company. The club plan to hold a big dance the same evening.

Miss G. Fortney, one of Mrs. E. Knox' pupils, will compete at the Edmonton Musical Festival to be held there during this month. Miss Selfridge is another competitor, and also a former pupil of Mrs. Knox. Gem community wishes all success to these youthful competitors.

On ahead, girls' of room at the top of your chosen profession.

Mrs. Maguire had the pleasure of the company of Mr. and Mrs. D. Griev and Mr. and Mrs. E. Small and children on Sunday last.

Messieurs Mack, Howard and Daley, with Mrs. Bonnie Ferguson, were Colony visitors on Tuesday, calling on Mrs. S. Selfridge and Mrs. Pollock and other friends.

On Sunday last Mr. and Mrs. Selfridge and family were dinner guests at the home of Mrs. Wm. Pollock.

Hussar News

HUSSAR, May 8.—Many loyal hals attended the game between the school teams of Hussar and Standard on Sunday at Standard, and were able to bring back the tidings of victory.

J. C. Duchin, of Glenora, was a business visitor in Hussar on Monday. Harvey Smith motored over from Bassano on Monday.

Ray Edwards, of Cluny, was in Hussar the first of the week.

An enjoyable birthday party was held at the home of Jack Williams on Sunday. The following were among the guests: Misses Irene Walters and Lela English, Earl Houghton, Shorty Drury, George Wellers and Bert Young.

The following were among those from Hussar to attend the luncheon put on by the Drumheller Board of Trade Friday. The guests were: A. C. Clifford, E. J. Bell, C. T. Armstrong, L. N. Snyder, J. B. Hurs, P. R. Reeves, R. N. Siles, A. Mahoney, C. Porter, T. A. Wicks, and A. M. Mahoney built a garage the first of this week.

The pupils of the intermediate and primary towns spent the afternoon of Friday cleaning up the school yard and the school room.

Mrs. Lorne Whyte went to Bassano on Monday.

Mr. and Mrs. W. C. Reesor and children motored to Bassano on Monday.

Mrs. J. B. Macdonald returned from Winnipeg on Wednesday after an extended visit with her daughter, Mrs. McFarland.

Last Saturday Mrs. Geo. T. Broom had a narrow escape from a fatal accident. The horses ran away from the field with the drill. Mrs. Broom thought to deflect them from their course, and just as she approached the horses they swerved, and in attempting to avoid them she slipped on a rock and fell. The team escaped and charged back, and she was thrown from the shoulders down. Two ribs were broken, a knee dislocated, and her leg badly lacerated.

The card party and Mother's Day program put on by the W. I. of Chancelor last Friday was a most successful affair, and thoroughly enjoyed by all present. Those from Hussar who were able to avail themselves of the opportunity to attend were: Mrs. W. Day Schooling, Mrs. A. C. Clifford and Miss Evelyn, Mrs. H. D. Brown, Mrs. T. Bettley, Mrs. Lorens, Mrs. J. Dundas, Mrs. A. Anderson, Mrs. C. W. Hayes, Mrs. F. Flary, Mrs. A. J. Keddie, Mrs. T. L. Montgomery, Mrs. E. A. Holland, Mrs. J. B. Bell.

Mrs. Lucille Westland and Miss Zella Williams motored to Bassano on Friday.

J. S. McLennan motored to Calgary to bring back Mrs. McLennan and baby came down on the train.

Mrs. Middleton and her son came from Calgary to visit with Miss Edna Macdonald last week.

Mr. Shoenaker, the truck driver, met with bad luck owing to the severity of the storm Friday morning, and was not able to reach Calgary, and the bus missed the Friday even-

WEDNESDAY HALF HOLIDAY NEXT WEEK

Wednesday afternoon next week, May 15th, is the first half holiday of the summer season. On that day the streets will close at 1:00 P.M. noon.

The Wednesday half holiday period is from May 15th to August 15th, inclusive.

TOWN COUNCIL HOLD MEETING

Court of Revision on 1929 Assessment Held to be Held on 4th

The monthly meeting of the town council held last Tuesday evening was held on Tuesday, as Monday was a holiday.

A letter was received from the Bassano Board of Trade asking for improvements at the water camp. The letter was referred to the town engineer with a suggestion to proceed with the necessary work. This will provide for the building of a shelter over the stairs in the camp grounds.

Lot 5 Block 10, Plan 3155W was sold to John Hedlock, of Bassano.

The town auditor's report for the quarter ending March 31, 1928, was received and accepted.

Robt. McLean, K. C., was re-appointed a member of the Bassano Local Board of Health for the next ensuing three years.

The court of revision on the 1929 assessment roll was ordered to be held on Tuesday, June 4th, 1929, at 8:00 o'clock p.m., in the Town Hall.

Town engineer Fred Mead was directed to make a survey of all lanes, alleys and back premises to ascertain whether there were all properly cleaned up.

An advertisement re irrigation water for private consumers was ordered to be placed in the local newspaper, and also a warning to residents to keep domestic animals under proper restraint.

Accounts

The following accounts were read and passed for payment:

United Elec. & Eng. Co. \$51.50
Telephone 78.87
Comp. Camp Board 76.30
Mother's Day Schooling 54.90
McKen's Store 1.70
Bassano Radio Shop 24.81
Boroughfield & Machine Co. 14.95
S. B. Bears Ltd. 10.35
Bassano Mill 10.35
Pay Roll for April 849.17
Bassano School Dist. 4000.00
Wm. Hunter 24.80
H. M. Wright 11.97
Canadian Gen. Elec. Co. 53.49
W. R. Playfair 25.80
Crown Lumber Co. 56.80
A. R. Maurer 9.85
Currie & Milroy, Ltd. 24.35
Flanagan Bros. 2.70

A. T. Connolly, in reporting for the tree planting and auto camp committee, said that 240 trees were planted on the street last Monday.

The trees were supplied free by the C.P.R. D.N.R. nurseries at Brooks.

Rev. P. C. McCar, chairman of the cemetery committee, said that 20 crosses were being placed on the cemetery grounds.

Geo. Travis reported that the swimming pool committee would commence at once to have the improvement planned for the pool.

A motion was passed voting a sum not exceeding \$250 for the completion of the swimming pool.

The president reported that some time in the near future, J. O. Haney, of the International Harvester Co., would visit Bassano and give a talk on agricultural problems.

On behalf of the baseball club, L. Runions brought up the matter of the baseball bleachers which some years ago were removed from the ballpark and taken to the fair grounds, without compensation to the baseball club. It was suggested that the money for the bleachers, the Board rebuild the wire back stop at the ballpark. The matter was referred to the public affairs committee.

Mr. and Mrs. E. J. Bell motored to Calgary on Wednesday to attend the convention of the Foresters and the ball and banquet in the evening. They returned on Thursday.

Mr. and Mrs. J. S. King and Mrs. C. T. Armstrong motored to Calgary on Wednesday to attend the graduation exercises of the nurses at the General Hospital, at Miss Leslie Jenkins was among those graduating. They returned on Thursday.

Miss Lola McKinney and Miss Lela English, were Bassano visitors on Wednesday.

Town Of Bassano NOTICE RE IRRIGATION WATER

Notice is hereby given that applications will be received by the undersigned at the Town Hall for irrigation water for garden purposes. Cost of installation to be paid by the applicant but the water will be supplied free of charge for the season of 1929.

Jan. R. Donaldson, secretary treasurer.

J. O. Haney, of the I. H. Co., will give an address in Bassano in the near future. He will talk on agricultural matters.

"Are You A Mason" Will Be Presented Next Friday, May 17

Local Amateurs Have Splendid Three Act Comedy

The Bassano Amateur Players, under the auspices of the Masonic Community Hall Committee will present "Are You A Mason?" in the Bassano public hall Friday, May 17th. The play will be put on in the Masonic Community Hall, and the profits will be turned over to the hall fund.

"Are You A Mason?" is a farce in three acts, and is said to be one of the most humorous plays ever shown in a real professional manner. Many excellent humorous situations develop in the plot, and the audience is kept laughing almost continuously. Every member of the cast of fourteen characters has been training faithfully for weeks under the direction of J. J. Johnston, and now the company is prepared to put on the play in a real professional manner.

The Bassano Orchestra will play between the acts, and also for the dance which will be held after the play.

East of Hussar the farmers have practically completed their seeding and a few more days will find seed in the furrows for another year. The ground is in good shape with plenty of moisture for the germination of the seed, and everyone is quite optimistic, but hoping the May showers will be coming along before many days.

At the Drumheller Board of Trade meeting last Friday Mr. Yorath gave an interesting address on coal-electric power versus hydro-electric, during the luncheon which was held in the banquet room of the White House.

Afterwards the members from Hussar met with the road committees of Wayne and Drumheller, and gave careful attention to the road situation. They decided to draft a joint resolution requesting the Department of Public Works to build a market road from Wayne to Hussar.

At the last meeting of the local school board the matter of teaching Grade 11 was discussed, and many of the pupils, now attending the Hussar school will enter the new school just being organized, and it will be possible to accommodate the numbers, and also there will be need for grade 11. It was decided to teach this grade next year. Many are in sympathy with the decision, as it will be a means of saving money, and the old school will be fitted up for the third term this year.

Residents Show Civic Pride By Planting Trees

Bassano Citizens Aim to Have Every Street Lined With Shade Trees

About 250 more trees were planted on the town streets last Monday, Arbor Day, May 6th. Trees were planted on both sides of Second Avenue from Roy Smith's garage, and on the street running south from the corner by the tennis court to Second Avenue. Many trees were planted in the eastern part of the town also.

All the work was done by a gang of volunteers who turned out in response to the call of the local citizens.

The trees came from the Brooks nurseries of the C.P.R. D.N.R., and although not very large, most of them are good trees. Irrigation ditches have been made along the rows of trees, and this will ensure an ample supply of water.

BOARD OF TRADE

The Bassano Board of Trade held a regular session in the Hunter Hotel dining room last Wednesday, May 8, with 24 members present.

Pres. Wm. McLaw reported that a petition had been drawn up requesting the provincial government to continue the road between Bassano and Lathum. Completion of this road would be a great boon to farmers on the flow slope who desire to come to Bassano.

A. T. Connolly, in reporting for the tree planting and auto camp committee, said that 240 trees were planted on the street last Monday.

The trees were supplied free by the C.P.R. D.N.R. nurseries at Brooks.

Rev. P. C. McCar, chairman of the cemetery committee, said that 20 crosses were being placed on the cemetery grounds.

Geo. Travis reported that the swimming pool committee would commence at once to have the improvement planned for the pool.

NO CHARGE FOR IRRIGATION WATER

Incidents Will be Given Free Service During 1929

Irrigation water will be distributed free of charge to residents in Bassano during the spring and summer of this year. Those using the water must however, pay the cost of the work necessary to bring the water from the town irrigation ditch to the premises of the householder.

Applications for water should be made to the Town Hall. The installation work will be done by the local department of public works, or if done by others, must pass inspection by the department before the water is turned on.

The town irrigation system has been put in condition for use, but the water is not yet available. It is expected, however, that the pump will be started within a few days.

East of Hussar the farmers have practically completed their seeding and a few more days will find seed in the furrows for another year. The ground is in good shape with plenty of moisture for the germination of the seed, and everyone is quite optimistic, but hoping the May showers will be coming along before many days.

Radio—An Agency For Peace

The sittings now being held by the Royal Commission on Radio appointed by the Dominion Government to study the whole question of broadcasting, and make report to the Government as to best policy for Canada to adopt in the national interests of the whole Dominion, is having the effect of directing attention from the purely local and entertainment features of this latest of great modern discoveries and earning capacity to appreciate more fully the tremendous possibilities of aerial communication, both in a national and international sense.

While undoubtedly there is a feeling of regret in Canada that, because of natural causes, it is much easier for people in Western Canada to "listen in" on stations in the Central Western States than it is to "get" stations in Eastern Canada, and for Eastern Canadian listeners to receive the programmes broadcast from New York, Philadelphia, and other Eastern United States cities than it is for them to "tune in" the stations of the States, a condition for which it is hoped the present Radio Commission can find some solution, the fact remains that a closer community of interest between Canada and the United States, and consequently a still better understanding, is being developed by means of the radio. And community of interest and understanding is the greatest of all bulwarks to Peace.

But to many in this country it will come as a welcome surprise to learn of the great strides made by radio in Europe and the effect it is having in promoting greater understanding among the diverse nationalities and languages of that war-afflicted continent. It is almost inconceivable that within less than eleven years of the signing of the Armistice ending the Great War, the radio should be used in Germany and England to teach the people, not merely school children but adults, the French language; that international "book-up" of Germany, Poland, Austria, Hungary, France, and other countries are being regularly carried out so that people in Paris and Warsaw can listen to German concerts in Berlin and Hamburg, and the German people can enjoy the opera in Paris, or a great symphony orchestra in Vienna.

There are some good people in Canada who still retain the old-fashioned idea that it is unpatriotic, and liable to undermine British institutions in this country, if children are taught in our schools to speak and read French, German, or any language but English. In entertaining such ideas Canadians are far behind the times, they are not nearly so far advanced as they are in England and other countries where the learning of foreign languages is compulsory. If every Canadian child, whether of British or French descent, was obliged to learn both English and French, Canada would be a generation become more powerful, influential and prosperous. It would open to our people the rich literature of both races; it would give us greater prestige among all nations; it would help to promote our export trade in all the markets of the world. In this respect, by reason of the two great races, Canada has an opportunity no other nation enjoys, yet we are not only neglecting it, but many people urge that it would be disloyal to our British connection to encourage it. Yet Britain herself is doing it.

It is predicted that within three years, five years at the most, Canadians will, through the development of national broadcasting at home, and the use of the beam system of wireless across the ocean, be able to sit in their homes and "listen in" on the great programmes in the world broadcast from London, Paris, Berlin, Vienna, and other European centres of culture, art and music.

We can now speak with Europe by telephone from the heart of Canada's prairies, and the day is fast approaching, so there is no position to know authoritatively state, when by radio we will be in more or less constant communication with Europe, receiving the best they have to offer in public addresses, reports and instrumental music, and the important news of the day. In turn, Canada will be brought equally close to them. And, in no probability "seeing" European and European happenings through the instrumentality of the radio will more or less rapidly follow "hearing," just as in reverse order, the following will be the case.

And these things are all to the good, in the cause of world peace. As we know people and understand them our prejudices and suspicions are removed. We learn the truth about them, and we are able to see them with their own eyes and are inspired by lofty motives; they love the things we love and hate the things we hate, the ugly, vicious, just hate them. As we come to understand their problems, difficulties and aspirations, and they come to understand ours, mutual sympathy will develop, followed by a desire for co-operation, rather than antagonism.

It is only so, through mutual understanding, that permanent world peace can be maintained and the maximum of true progress be made.

Artistic Trip Abandoned

Fridtjof Nansen, celebrated Arctic explorer, has revealed that the proposed Polar expedition cruises of the Great Zeppelin which were planned for 1930 probably would be abandoned as a result of Germany's restriction of aircraft subsidies. Nansen has just arrived from the United States. He said he was worried over the difficulties which arose as a result of Germany's recent budget slashing.

FLU Germs Breed In The Throat.

First: Appear As A Common Cold, But Gain Tremendous Headway In Six Hours

SOME SIMPLE PRECAUTIONS AGAINST INFLUENZA

Simple precautions taken now will enable you to fight dread "Flu" which is sweeping rapidly through the whole country. The germs of influenza gain access to the body through the mouth and throat. Keep the throat healthy, and you go a long way towards stopping the trouble. An effective means of prevention is to gargle the throat three times daily with Nerville's. Half a teaspoonful of Nerville's in water makes a most efficient gargle. The germ-killing properties of Nerville's quickly destroy any bacteria in the mouth or throat. If the chest is sore, if the throat is hoarse, if you have a cough—be sure to rub the neck with Nerville's. Every drop of it will rub in, and out will come the congestion.

Of course it is absolutely necessary to house-clean the system with Dr. Hiram's Pills which stimulate the eliminatory organs, and rid the system of disease-breeding germs. This combination treatment of Nerville's and Dr. Hiram's Pills will give prompt and entirely satisfactory results.

Protecting Canada's Fisheries

Means Taken To Guard Against Depletion Of Finny Tribe
River and lake fisheries certainly, and sea fisheries probably, if left to themselves, conform to the economic law of diminishing returns. The Canadian Government, accordingly, has had for a main object the prevention of depletion, the enforcement of close seasons, the forbidding of obstructive and polluting, and the regulation of nets, gear and fishing operations generally. In addition, an extensive system of fish culture has been organized. The Dominion operating 25 hatcheries, 6 subsidiary hatcheries, and 4 salmon retaining ponds in 1927.

RHEUMATIC PAINS

Cannot Be Rubbed Out — The Trouble Must Be Treated Through the Blood

The pain of rheumatism is something that you cannot rub out. Ever-rubbing from rheumatism has been advertised by "Covers," who say "on the oil on the affected part, but after rubbing the pain remained." Thin blood and rheumatism come together and if they are properly treated will go together. Rheumatism means thin blood, and thin blood is something that can be bettered, but it will not build up the blood until the rheumatic poisons are driven out. This is exactly what is done in the treatment of rheumatism with Dr. Williams' Pink Pills. In any form shows improvement as the thin blood is built up, and when the blood is in the condition are overcome and driven out rheumatism disappears. The blood is kept rich and red. Dr. Williams' Pink Pills in the treatment of rheumatism is proved by the case of Mr. Thomas Martin of New York, who says: "For some years I was so badly afflicted with rheumatism that I could hardly walk and suffered great pain. I had medical treatment but it did me no good. Then I decided to try Dr. Williams' Pink Pills. The trouble disappeared and has not returned, showing the least sign of returning."

You can get these pills from your druggist or by mail at 50 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

Northern Air Ports

Settlements in Northern Manitoba To Have Air Mail Service
Manitoba's northern settlements of Oxford, Godhavn, and Island Lakes will be added to the growing chain of northern air mail points of call. Hon. P. J. Veniot, postmaster-general, announced in the House of Commons.

Mr. Veniot stated that arrangements had been completed for the conveyance of mail to and from these northern points once a week by aeroplanes of the government forestry patrol at Norway House, at the north end of Lake Winnipeg.

A Female Piped Piper

Woman in London Declares Rats Are Charming Creatures

A woman's love for rats has led to a certain quantity of London being overrun with the pests that official action is to be taken. This female piped Piper declares that rats are charming creatures, and she shares food in her garden for them every morning and evening. Neighbors have protested so loudly that efforts are to be made to capture the rats by smothering them out. There is nothing under the existing law to prevent persons feeding any kind of animals or vermin on their own ground.

Requisite On the Farm. — Every farmer and stock-raiser should keep a supply of Dr. Thomas' Electric Oil on hand, not only as a ready remedy for ills in the family, but because it is a horse and cattle medicine of great potency. As a salve for sweet oil for horses and cattle, the affected by colds, it is far beyond anything that can be administered.

Pulse Economy
There are not many people who would die of starvation rather than dig into their savings, but we often see men who do not know how to enjoy their money. They save by denying themselves the natural pleasures of life and in the end are forced to leave their money to people who never helped to earn it.

"I've for a five-days week. How 'bout you Sam?"
"Mebbe I've for a five-days week end."

At 452 degrees below zero some metals, such as silver and copper, become superconductors.

More than 50,000,000 rabbit skins are made into felt hats in the United States every year.

Minard's Liniment—good for tired feet.

Eager To Get Land

Homestead Land In The Peace River Country Are In Demand

An unprecedented demand for homestead land in the Peace River country, Alberta, is indicated by the records of the Canadian Government. According to the records of Grand Prairie, for the year ended March 31, 1929, at the Peace River office 3,024 entries were made in the 12 months under review, compared with 903 in the 12 months ended March 31, 1928, and at Grand Prairie the entries were 2,368 for the 12 months ended last March as against 958 in the previous corresponding period.

The Peace River country is an area extending over 47,000 acres north and west of Edmonton. It is larger than the States of Oklahoma, Missouri or North Dakota, and exceeds the combined areas of the States of Pennsylvania, West Virginia, Delaware, and New Jersey. In 1928 over 8,000,000 bushels of wheat were grown in the Peace River country, an amount greater than the total exportable wheat surplus of Canada 28 years ago. Remarkable crop yields and equable climate are drawing much attention to the district, and it is now regarded as one of the most productive areas in the Dominion and the last great agricultural frontier in North America.

Measuring Lightning Flash

No Part Of It Ever Lasts For Appreciable Time

A lightning flash takes about one-seventh of a second to last. The speed of a lightning flash has been measured. It has also been proved that lightning starts from the clouds and the ground at nearly the same instant, and approximately one-seventh of a second later the two ends unite in mid-air. These facts were determined by Dr. C. U. Boys, a British physicist, who has been attempting hundreds of photographs of the last twenty-six years, until a stroke of lightning in New York at last gave him this information.

Badly Handicapped

Salesman—How did you come to have the accident in that used car?
Buyer—"I couldn't put my hand when I was pushing it around the corner."

Life is a grindstone, and whether it grinds a man down or polishes him up depends on the kind of stone he's made of.

Smile—Her face was like five miles of detour.

What Will you do

There is hardly a household that hasn't heard of Castrol! At least five million homes are never without it. If there are children in your family, there's almost sure to be a bottle of Castrol in the house. Just a few drops, and that colic or constipation is relieved; or diarrhoea checked. A vegetable codger, a baby remedy meant for young folks, is a good thing for the old. You have ever heard doctors advise giving to infants. Stronger medicines are dangerous to a tiny baby, however harmless they may be to grownups. Good old Castrol, remember the name, and remember to say it. It may save you a sleepless, anxious night. It is always ready, always safe to use; in emergencies, or for everyday ailments. Any hour of the day or night that Baby has trouble, the reassurance to Castrol is never more popular with mothers. It is today. Every druggist has it.

When your Children Cry for It

Attractions For Tourists

Vast Extent Of Canada Offers Visitors Interesting Holiday

Canada has a million square miles of forests, country lakes, and thousands of miles of rivers and brooks, providing the most hunting, fishing, canoeing and camping. The vast extent of Canada and the diversity of conditions in different sections make it difficult for the prospective visitor who is not familiar with the country to decide which particular section interests him most. To overcome this the Department of the Interior has published "Vacations In Canada," a 96-page handbook which sets forth the attractions which Canada offers to tourists and sportsmen. This booklet describes the tourist attractions of each region in the Dominion—the climate, the motor roads, the points of historic interest, the fishing, hunting, canoeing and camping, the principal cities and the popular summer and winter resorts. In addition it gives a summary of the Canadian Customs regulations. "Vacations In Canada" is distributed without charge, from the Natural Resources Intelligence Service, Department of the Interior, at Ottawa.

Wins Oratorical Contest

Marceline Brunel, 17, of Norwood, Man., representing the province, won the Manitoba oratorical contest last night. She was opposed by ten entrants from English-speaking schools in the final match. Miss Brunel will represent Manitoba in the Canadian oratorical finals, which she attended at St. Adolphe, Man.

Sore Corns Drop Off If You Use "Putnam's"

When you notice any sign of callous on the foot, apply Putnam's. The time to paint on a few drops of PUTNAM'S is before the corn starts to do this, and you prevent corns. No matter if the corn is hard or soft, it will drop off. PUTNAM'S CORN EXTRACTOR. It does the work—and rids the corn, quickly and without pain.

Health and Motor Accidents

Men with high blood pressure should use extraordinary care in driving automobiles, according to recent experiments conducted by psychologists of the National Research Federation. These experiments showed a definite relation between nervousness and motor accidents. Men with high blood pressure were found to have more than twice as many accidents as those with normal pressure.

No surgical operation is necessary in removing corns if Holloway's Corn

remover be used.

Every automobile can be driven

at a low price on the basis of Jacksonville, Fla. The sand is as firm as on a paved street.

Minard's Liniment relieves pain.

Einstein should make a good train car or bellhop, as nobody can understand what he is talking about.

These tribes, the professor said

were descendants of Magyar nomads who left their homeland to conquer Europe with the army of Attila 1,100 years ago.

R.C. Salmon Park

The position as regards the salmon pack of British Columbia is improving under present conservation methods. The 1928 pack is now reported at 3,635,637 fish, which is only 29,541 cases lower than the record pack of 1926. The pack of pinks totalled 792,362 cases, or 19,369 cases more than the 1926 record.

Miller's Worm Powders can do no

injury to the most delicate child. Any child, or infant, in the state of adolescence, who is infested with worms can take this preparation without the least harm to the stomach, and will find it a full protection against these destructive parasites, who are responsible for much sickness and great suffering to legions of little ones.

The Teacher—You have failed in

geography again. Bobbie—No. You only said me that I know the capital of Minnesota. I said I didn't which, was true.

Worms cause fretfulness and rob the infant of sleep, the great troublers. Mother Graves' Worm Expeller will clear the stomach and intestines and restore healthfulness.

From July 14 to 17, 1915, 58,815

inches of rain fell at Baguio in the Philippine Islands. More than 45 inches fell on one day.

Neuralgia succumbs to Minard's

Liniment.

Will Defer Discussion Of Reduced Naval Power Until a Later Date

Geneva.—Complete agreement has been reached by the big five naval powers to refrain from detailed examination of the naval problem at the present session of the preparatory conference for a disarmament conference. It was learned here in responsible circles.

The question of reduction of the fleet as a supplement to the Washington naval treaty will be adjourned to a date which will be left until the main conference. The five powers will continue conversations on the naval problem. The form of these conversations was understood to be not yet determined, but would probably be exchange of notes between the five nations.

These may possibly develop into a meeting of experts from the United States, the United States, Japan, France and Italy.

The main theme of these conversations will be the American suggestion for agreement on the formula for estimating the equivalent tonnage of cruisers, destroyers and submarines by considering such factors as age, tonnage, displacement and calibre of guns.

It was understood that Japan in particular, the most distant of the five countries from Geneva, would ample time to study the American ideas, which are also being received by the powers generally with favor.

Tribute To Wheat Pool

Reference Made To A. J. McPhail In United States Senate

Washington.—Running through much of the discussion of the farm relief bill in the Senate are references to the Canadian Wheat Pool and its workings as explained recently before the Senate committee on Agriculture by A. J. McPhail, of Regina, head of the Canadian Wheat Pool. He was frequently pointed out in the debate that the stabilization corporation under the plan would be expected to function much as the great co-operative pool of Canada functions.

Senator Norbeck of South Dakota, prominent member of the Senate committee on agriculture, paid high tribute in a recent speech to Mr. McPhail. Senator Norbeck said Mr. McPhail was sincere and careful in his statements. He emphasized, however, that the Canadian Wheat Pool had not brought Canadian wheat farmers a very large increase in prices.

Senator Norbeck, in summing up, said Mr. McPhail stated frankly that the big result of the Canadian wheat pool was the better support of the price that had been developed among the farmers. He did not count the small additional price that had secured as the most prominent reward.

Canada Had Good Year

League Review Shows Dominion Enjoying Unprecedented Prosperity

Geneva.—"Canada enjoyed a year of unprecedented prosperity," says the Review of Economic Conditions in 1928, issued by the League of Nations, as a basis of the work of the committee on the economic condition.

North America, the report continues, it seems probable was the continent where trade developed most rapidly. The United States not only maintained its position of the world's leading country, but had increased its excess of exports over imports.

Need Coal Agreement

Geneva.—The economic committee of the League of Nations, which has made exhaustive investigation of the world crisis in the coal industry, reported that international agreements between producers concerning output and markets must be made. There is to be hope for improvement. A similar conclusion was recently reached by experts on the sugar situation.

Loyalty Of Acadians

Ottawa, Ont.—In replying to the criticisms leveled against him in the House of Commons, the Hon. J. A. A. Macdonald, Minister of the Interior, said in a spirited speech that the loyalty of the Acadians of which he was one, to the British crown, he held so, he said, because he had been attacked by certain newspapers.

Rioting In Berlin

Communists Baffle Cautious In May Day Battle

Berlin.—Communists in an attempt to conquer the streets on May Day, caused an ugly riot in the working class quarter in northern Berlin. They created barricades, using street repair material, and held off police with rifle and pistol fire until armed cars forced the strikers and enabled the authorities to clear out the surrounding houses.

At midnight the cannoning for the day had increased to eight dead and 78 seriously wounded. Hundreds of others suffered, besides from missiles or police's shot.

The rioters erected barricades in the main thoroughfare of the Pankestrasse and its side streets. The police charged them repeatedly with batons until the commanding officer realized that his force was too weak for this tactic and ordered his men to open fire. Then armoured cars were brought up by the police and finally captured the barricade.

Opening Canadian Legation In Tokio

Hon. Herbert Markie Will Take Up Duties As Minister

Ottawa, Ont.—It has been announced from the department of external affairs that Hon. Herbert Markie, before undertaking his duties as Canadian minister to Japan, is making a short visit to England. In the meantime, arrangements are being made for opening the Canadian legation in Tokyo. Mr. Hugh L. Kennedy will be appointed first secretary and Charles D. Affair will be Mr. Markie's arrival in Japan, and James A. Langley, Canadian trade commissioner in Japan, will also act as commercial secretary of the legation.

A third appointment will be made during the summer. Mr. Markie, who has resided from an early age in Vancouver. He is a graduate of the University of British Columbia and of Clark University, Ypsilanti, Michigan. He has been appointed by the Japanese government as its representative at Ottawa.

Canadian Press Meeting

Officers Are Elected At Annual Gathering In Toronto

Toronto.—The annual meeting of the board of directors and the members of the Canadian Press, the co-operative news association of the daily newspapers of Canada, closed over three days, were concluded by the election of officers for the year as follows:

President, E. Norman Smith, Ottawa Journal; first vice-president, John Scott, managing director of the Toronto Mail and Empire; first vice-president, Mr. E. Nichols, Winnipeg Tribune; second vice-president, Henri Gagnon, Quebec Le Soleil.

J. P. H. Lively, continuing as general manager and secretary. With a view to giving increased representation to the French language, daily newspapers of Quebec and also to the western provinces, the annual meeting enlarged the board of directors from 15 to 21.

Italian Arrested For Killing Chancellor

Assassination Official When Application For Documents Was Refused

Brussels, Belgium.—While walking along a street, Alfredo Arca, a member of the Italian legation in Luxembourg, was shot and killed. His assailant, who was arrested, was an Italian, named Giovanni Carrara, who recently settled in Luxembourg. He had applied to the legation for certain documents, but his application was refused.

World's Largest Cattle Team

Halifax, N.S.—The biggest cattle quip ever made in the Northwest is too small for what is considered the largest cattle team in the world. That was the discovery made by Guy Howard after he completed a seven-foot quip. Now he's engaged in making a 10-foot quip which he believes will "beat" the team. The cattle together weigh 7,000 pounds.

CENSURE MOTION IS DEFEATED BY MAJORITY OF 24

Ottawa.—The House of Commons defeated another wave of confidence motion involving censure of the postmaster-general. This time the amendment which, like its predecessor, was moved by H. A. Stewart, was defeated by 24 votes.

It was a general amendment declaring that "the administration of the post office department by the present postmaster-general has been characterized by inefficiency, disregard of the provisions of the civil service act, the post office act and other statutory authority, and merits the disapproval of this House." Mr. Stewart's former amendment, moved a few days ago, involved censure of the postmaster-general in connection with the appointment of a postmaster at St. John's. It was defeated by 27 votes.

In the division today, the Conservatives carried with them in support of the amendment the majority of members of the U.F.A. group in the House, Liberals and Liberal-Progressives, as well as in opposition to the amendment.

Votes recorded in favor of the amendment numbered 68, and against 92. In moving his amendment Mr. Stewart said facts had been brought out which had started the country. The background of the matter was the civil service commission, and the attitude of the postmaster general. From October 1, 1927, to February 1, 1928, the postmaster-general had dismissed 98 postmasters, and from February, 1928, to April, 1929, eight more dismissals had been made.

In 32 cases of appointments by the commission, rejections had been made for which Mr. Veniot, in some cases returned soldiers had been rejected in favor of civilians. He had depicted in the House the postmaster-general had dismissed 98 postmasters, and from February, 1928, to April, 1929, eight more dismissals had been made.

Mr. Veniot declared Mr. Stewart had omitted to point out in the what way his administration was inefficient, or in what manner he had violated the civil service or any other act.

It was charged, he added, that he had disregarded certificates issued by the civil service commission. That was correct, he said, but he had done so only for valid reasons, and was given authority to do so under the act. He had only done his duty, said the postmaster-general, as head of the postal service of Canada.

There had been charges which questioned his loyalty. These were unjust, Mr. Veniot said.

Would Welcome Naval Reduction

Toronto.—It was learned here that Count N. Soko, Japanese delegate to the preparatory commission on disarmament at Geneva, had been instructed to agree to a proposal that a sub-committee would be formed by delegates from the five leading powers to consider proposals of the United States delegate, Hon. Hugh R. Gibson, for broad naval reduction.

Postpones Long Flight

Berlin.—Captain Holman Koch, noted German trans-Atlantic flier, told the Associated Press that his projected flight to the United States after it had cost \$125,000. To this amount the government proposed four-pound grant must be added. The total amount for relief will therefore be \$129,000.

Canoe Trip Across Canada

Two Montreal Yachts Commence Journey From Vancouver

Vancouver.—Paul Paré and Paul Levesque, two Montreal youths, started out recently on what they hope will be a canoe trip across Canada. Their 19-foot canoe was jammed with camp equipment and supplies as they pushed off from the recreation pier at English Bay to the ferretails of a crowd which had gathered to wish them "bon voyage."

The canoeists plan to travel up the Fraser River to Lytton and from there up the Thompson River to Sicamous, as the first part of their trip. They expect to reach Halifax in seven months.

Prairies Not Represented

Have No Men On This Year's Hockey Team

Ottawa.—The personnel of the Canadian Hockey team has been announced from the office of the Department of Canada. There are five Toronto men on the team, four from the West and three, while Victoria and Vancouver have two each.

Five fifteen, including two from Hamilton, were named to the team. The five from the West are: two from the West, four from the West, and three from the West.

SUNDAY SCHOOL LESSON

MAY 12

THE EARLY MINISTRY OF JEREMIAH

Golden Text: "We must obey God rather than men." Acts 5:29. Lesson: Jeremiah 1:1-10. Devotional Reading: Psalm 24:1-7.

Explanations and Comments: Jeremiah's Call and Commission. Jeremiah was called to be a prophet in the thirteenth year of Josiah.

TEST FOR PLACER GOLD
 NEAR MEDICINE HAT
 Drilling operations to determine the possible location of valuable placer beds along the South Saskatchewan River near Medicine Hat have recently been undertaken. The work is being carried on by Geo. L. Holmes, of San Francisco, and H. L. Beckman, who have had extensive experience in placer mining fields in various parts of the world. The tests will determine whether the values payable are sufficiently great to warrant drilling on a large scale.

MOTHER'S DAY
 Of all the days which are marked for some special purpose, there is one which stands out clearly and in bold relief, high above the others. It is Mother's Day, which will be observed this year on Sunday, May 23rd.

Not only this day, but every day, should be Mother's Day, for, as Coleridge wrote, "A mother is a mother will, the holiest thing alive." This is truth, deep and profound. There is nothing which can take away from mother the sublime fact of her motherhood. No matter what may happen, she is a mother will, with a mother's love, devotion, heartaches, and maternal solicitude.

The task of motherhood is divine. What suffering and self-sacrifice she bears for her children; what love and affection she bestows upon them! What kindness, sympathy, encouragement, and readiness to comfort and help us from the time when we were babes, and on up through the years, when our feet strayed away from the family hearth.

Mother—God bless her! God will surely bless her who has so richly blessed us.

MORE TREES
 From the willingness shown by Bassano citizens in turning out to plant trees last Monday, it is quite obvious that there is in town a great appreciation of the value of trees.

It was a pleasure to see the vigor with which shovel and crowbar were wielded, and the eagerness to plant more trees every spring. Before long every street will be lined with beautiful shade trees, and the town will, in fact, show every now and then an appearance that residents may well be proud of.

FREE IRRIGATION WATER
 The town irrigation system is now ready for use. No charge will be made for irrigation water this year; it is free. But the householder must bear the cost of the work necessary to bring the water to his premises. This arrangement appears to be fair enough for the householder, in most cases the expense will be small and free water will be provided all summer.

Those who wish to use irrigation water would be well advised to make application for it at once. Early and copious irrigation will bring better results with trees and garden.

THE MOTHER'S PRAYER
 Starting forth on life's rough way,
 Father, guide them;
 Oh, we know not what of harm
 May befall them;
 'Neath the shadow of Thy wing,
 Father, hide them;
 Walking, sleeping, Lord, we pray,
 Go beside them.

When in prayer they cry to Thee,
 Do Thou hear them;
 From the stains of sin and shame,
 Do Thou clear them;
 'Mid the quicksands and the rocks,
 Do Thou steer them;
 In temptation, trial, grief,
 Do Thou near them.

Unto Thee we give them up,
 Lord, receive them;
 In the world we know must be
 Much to grieve them—
 Many a thing of evil and strong
 To deceive them;
 Trustful in Thy hands of love
 We must leave them.

—W. O. Bryant
 No Terrors For Him
 One Saturday a small boy saw some men working at a schoolhouse, and inquired of one of them what they were doing.

"Installing an electric switch," he was told.
 "Oh!" said the youngster. "Well, I don't care. We're moving next week, and I'm not going to this school any more."

Safety First
 Being had a new dime to invest in an ice cream soda.
 "Why don't you give your dime to the mission?" said the minister who was calling on him.
 "I thought about that," said Beside, "but I think I'll buy the ice cream soda and let the druggist give it to the mission."

LORENZO SMITH
 (by E. V. Knox)
 Here in this old sequestered street,
 Removed from London's core and pith,
 It does me good, by Jove, to meet!
 From time to time, Lorenzo Smith
 He brings me news of greater things
 Out of the world where fashions flow,
 Authenticated happenings
 To people who are in the Know.
 Talking to him I feel at one
 With every dream in my own Town.
 He joins at greatness with his gun,
 And reputations tumble down.
 I see the night all hung with stars,
 The day time with its storm and stress,
 I understand the social part
 In the Agglutinated Press.
 As by some chapel in the wood
 Gowan, perhaps, laid down his head
 And cold the hermit how things stood
 With Laurence and with Gainsford
 He tells me of the Feast, the Hunt,
 The banquet scarcely yet begun,
 The Stranda! that must soon come out
 The Epigram but half conceived.
 He brings me news of Fame's reward
 And what was said by Lady Pughie,
 About whose hospitable board
 The minor lions sit and muse,
 And all the time I understand
 The thing dispensing such an affair,
 Loving the simple, not the grand,
 Lorenzo happened to be there.
 That is the sweetness of his touch,
 Scouring the Follies of the Day
 His popularity is such
 That no one lets him keep away.
 So to my aim requested street,
 Where London always seems a myth
 It does me good, I say, to meet
 (From time to time) Lorenzo Smith.

WILL CONTINUE TO ADVERTISE ALBERTA COAL
 The Alberta coal publicity office in Toronto will be continued during the coming season as part of the program of popularizing the Alberta fuel on the Eastern market.

"In power, ease of driving, and flexibility, the new McLaughlin-Buick outperforms any car I have ever driven." (name on request)

THE owner quoted above has been driving automobiles for 15 years, and has an intimate knowledge of motor car performance and value. Yet his enthusiastic comment merely typifies that of thousands who have turned to McLaughlin-Buick after making their own exacting tests.
 Not only have motorists in all parts of the country accepted McLaughlin-Buick's invitation to get behind the wheel and get the facts about McLaughlin-Buick performance... but they have entered orders for more than twice as many McLaughlin-Buicks as any other car at or above its price.
 Be sure to drive a McLaughlin-Buick! Try it in traffic—on the straightaway—up the steepest hills. The more thorough your tests, the more careful your comparisons—the more purely typifies that lead you to McLaughlin-Buick! 24-48

FORTY-FOOT GIFT FOR RIDEAU HALL

This totem pole is one of the finest examples of Indian art. Right: Their Excellencies Viscount and Lady Willington and the Hon. J. G. Macdonald, at the time of the gift. The totem pole was carved by the artist, Mr. J. G. Macdonald, and is now on display in the Rideau Hall.

When Viscount Willington, Governor-General of Canada, and Lady Willington visited the West Coast of Vancouver Island on the inaugural cruise of the new Canadian Pacific steamer "Princess of Wales," two new spears were marked for that far-flung corner of the Dominion.

It was the first time that a Canadian Viceroy had ever seen, and in turn, been seen on the rugged coast that is now known as one of the nation's important industrial and tourist regions; further the arrival of the Viceroy brought the most luxurious passenger steamer ever to ply in regular service in West Coast waters, now to be the permanent run of the staunch little Clyde-built vessel.

The West Coast had decked itself in gala attire for the visit of the great white chief from Ottawa, tremendous excitement prevailing among whites and Indians alike at the various ports of call. Local interest was heightened by the fact that their Excellencies cast formalities to the four winds, and entered into the spirit of the most gracious and celebratory with a zest not exceeded by any tourist on the coast. Incidentally, Lord Willington initiated after the fact.

HEALTH SERVICE OF THE CANADIAN MEDICAL ASSN. SPRING MEDICINE

There is a tradition that when spring comes we require some spring medicine to purge our bodies of the winter poisons. In the days of the early settlers of Canada, winter did mean misery and sickness, much of which disappeared with the coming of spring. The sickness associated with winter, among the pioneers, was largely due to their poor diet, staid meats, were their chief food, and there was a lack of vegetables and fruits. In addition, they lived closely crowded together for the sake of warmth.

In our times, our diet in winter can be sufficiently varied because modern methods of preserving foods and up-to-date means of transportation allow us to procure and use fresh vegetables and fruits or properly preserved vegetables and fruits all winter. Modern heating systems have made it possible for us to be comfortable during the winter, and there is no reason why we should now live and work in ventilated rooms, and so secure fresh air we need.

There is no reason to take spring medicines. There is reason, however, to look forward to spring and to make use of the advantages which that season brings. Compared with winter, this means that in the spring we can be out in the fresh air and sunshine. The only spring cure we need is nature's tonic which cures nothing and so can be taken by rich and poor, old and young, without a thought of expense. Nature's tonic is made up of fresh air and sun.

shine. It is ours for the taking. We must do the taking, however, if we are to benefit by it. The sunshine out of doors which makes the flowers and the grain grow will do us no good unless we get out into it and take our share of it.

Personal health cannot be bought by money; it is not to be found as medicine in a bottle. To secure health and to keep it, we must spend our time. We must take time to secure the spring tonic provided for us in nature's fresh air and sunshine.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered promptly by correspondence.

CALIFORNIANS COMING TO ALBERTA

Edmonton—Many new settlers are expected to arrive in Alberta from California this spring, according to Frank Peterson, of the Alberta Publicity Commissioners Branch, who has returned from a four months' visit to the Pacific coast states. On every side Mr. Peterson found Californians displaying marked interest in the province of Alberta.

VANCOUVER WHEAT SHIPMENTS

Vancouver—The 1927-28 record of 89,554,688 bushels of grain shipped from the port of Vancouver has already been passed, with over three months still to go to round out the present year.

INDIAN RUNNER DUCKS — Eggs for setting at \$1.50 for eleven; these ducks lay large white eggs, as mild as hens, and this breed will lay more in a year than average hen. If given equal chance, and 300 per duck per year is quite usual. Mrs. R. Snowden, Husar. 41-449

A little Scotch boy and his father returned from a painful interview with the minister to whom he had said in reply to a question that there were one hundred commandments. Meeting another lad on his way to the minister's, he asked: "An' if he asks ye how many commandments there are, what will ye say?" "Say?" replied the other boy. "Why, ten, of course."

"Ten?" said the first urchin in surprise. "Ten? Ye will try him, will ye?" I tried him w' a hundred and he was na' satisfied."

Little Spencer let no grass grow under his feet when uncle came for a visit before rushing up like this: "Uncle, make a noise like a frog."

"Why?" asked the old man. "Cause when I ask daddy for anything he says: 'Walt till your uncle croaks.'"

No Dog? Traffic Cop: "Let me see your license, please." Tourist: "Marriage, car, driver's, campfire, fishing, or hunting? Open the license trunk, Maria."

One Too Many A literary family to which a seventh child had just come was at a country house and for a time a good deal of the care of the other six children devolved upon the father, who had Spartan ideas as to the upbringing of his sons. One morning he carried his two-year-old to the creek near his home to give him a cold plunge. The child objected lustily to this proceeding, but was firmly held and ducked, notwithstanding.

At the instant of the ducking, however, a brawny hand seized the Spartan father by the shoulder and flung him back, while the angry voice of the farmer, who was his nearest neighbor, roared in his ears: "Here! None of that! I'll have the law on you for this!" For some time the father endeavored to convince the farmer that he was not trying to drown the child. Even then he wasn't wholly convinced. To the very last minute he kept shaking his head sceptically and saying: "Well, I dunno about that. I dunno. You got six besides this."

The Down Payment "Joseph, if your father could save a dollar a week for four weeks, what would he then have?" "A photograph, a new suit, a refrigerator and a set of furniture."

EXTENSIVE DEVELOPMENT OF TAR SANDS PLANNED

Extensive investigation of the bituminous sand deposits in northern Alberta will be undertaken as the first step in the two-year program of development of this valuable Alberta resource by the Scientific and Industrial Research Council of Alberta. The work will be conducted under the direction of Dr. K. A. Clark, of the University of Alberta, who for the past several years has devoted his attention to investigations along this line. The two-year program of tar sands development is an additional feature of the Alberta development plan for northern development. Keen interest is also being shown in the soil survey under the direction of Dr. Wyatt. The water survey carried on by Dr. Rutherford, and the pre-Cambrian mineral survey to be conducted by Dr. Cameron during the coming season.

Life is Like That Eysteinian is caused by the other woman; carache by the wife. —Cincinnati Enquirer.

Fabulous Person Gnob: "I never associate with my life to the youth." Glib: "I don't know; I never met any of your inferiors."

Ally Trifles, Irate father: "I can see right through that chorus girl's intrigue." Lovelock Son: "I know, dad, but they all dress that way nowadays."

(235) A skin game—Two young boys living 90 miles northwest of Edmonton started a coyote den in 1927 by digging young coyotes out of the ground and confining them in a pen. They got 140 young cubs and when their skins were mature would them for \$12 each.

A southern packing plant specializes upon horse meat for shipment to parts of Continental Europe where it is very popular. It has been suggested that the nondescript race horse straying about southwestern Alberta be herded for packing purposes. A pity someone could not figure out a dealer way of containing some of the old motor cars that are loose on the highways.

Twenty old burners measuring overall 97 feet in length and weighing 725,000 pounds have been ordered by the Canadian Pacific Railway and will be in passenger and freight service through the mountain west of the work of two or more of the lighter locomotives. They are the largest in the British Empire and will revolutionize transportation in the west. It is predicted.

Victoria is having a mid-winter golf tournament open to members of the local clubs and to guests of the Empress Hotel, and the players won't have to play in mittens and fur coats either. In fact they have a game called winter golf that they play with bow and arrows on skis or snowshoes, but the golf at Victoria is the legitimate article. The game is played the year round in the equable climate of the Pacific coast.

Unique and luxurious cars, differing from anything operated in this country before, will be carried by the two crack lines of the Canadian Pacific Railway, the Trans-Canada and Vancouver, and the Mountaineer, from Chicago to the Pacific coast. It has been announced. The cars will have bath room, maid service, lounge and smoking space, and a solarium, with vit-a-glass windows.

The sea is constantly productive of tales of adventure. A recently told story is that about Commander B. Hamilton, O.B.E., of the Canadian Pacific liner Empress of France who turned his ship into the face of a hurricane and went 100 miles out of his course to take aid to a small steamer on a slight touch Japanese destroyer. The great liner waited beside the freighter, which had been badly battered by the waves and some members of the crew had been injured. They found it impossible for boats to pass between the two ships for very a doctor. After waiting for half a day the master of the Japanese ship reported that he could make port, and the Empress of France continued on her interrupted voyage.

In Early Britain---

We have traced the art of Brewing from the Greeks of 500 B.C. up to Ancient Rome. The Roman soldiers introduced it to the early Britons. Previous to their invasion the usual drink of the early Britons were water, milk and mead — an intoxicating drink made with honey.

They being so suitable to the climate, and so easily made by an agricultural people with plenty of corn, it was gladly welcomed and soon became the national drink, being the popular drink even to this day.

Today Most Beverages BEER — ALE — STOUT are considered Health Drinks.

Where BEER has once been introduced, it has generally become the national beverage.

OUT OF DOORS
(By Charlotte Perkins Gilman)
Just to be out of doors! So still! So green!
With underneath a fair, limitable
floor.
With soft, sweet scent of happy
growing things,
The leaves soft flutter, sound of
under, wings.
For, faint little, the water wide
between,
Drops of the gray, earth-mother
Here we lean
With no conventions hard to interpret.

case.
Content, with the confinement nar-
rowly brings.
Just to be out of doors.
And under all the feeling, half fore-
noon.
Of what this lovely world will come
in mean.
To all of us when the uncouth
strings.
Are keyed right, and one clear
music rings
In our hearts. Joy universal, keen,
Just to be out of doors.

Chancellor

Local News

CHANCELLOR, May 2.—Instead of holding the regular monthly meeting last Friday afternoon the Chancellor W. I. held their annual Mother's Day social afternoon. Court white was played, ten tables, accommodated the guests. The winning ladies were Mrs. F. Crowe, 2nd Miss Ruth Francis. After cards a nice program was presented as follows: a singer, "Mother's Day," by the president, Mrs. Young; solo, "Sing Me to Sleep," followed by a return number, "Asleep in the Deep," by Mrs. Hanson; reading, "Our Lady," by Mrs. Chayters; song, "Little Mother of Mine," Mrs. Muir; piano solo, selected, by Mrs. Penke. The program, which everyone enjoyed, was followed by tea and a social hour. Many ladies from Hussar and Standard came and the Chancellor ladies, the ladies received quite a few compliments on the success of their afternoon. Mrs. Bell, on behalf of the Hussar ladies sincerely thanked the Chancellor ladies for extending the invitation to all the Hussar ladies. Mrs. Whit, on behalf of the 8 standard ladies, also thanked the Chancellor ladies, and Mrs. Gregory on behalf of the U. P. W. A. of both Standard and Hussar, also gave a vote of thanks. During the tea hour Master J. Thompson gave a few selections. It was altogether a very pleasant and well arranged afternoon, and much enjoyed by all.

We regret to announce quite a few serious illnesses among the Hussar members of the community. On Saturday Robt. Boyden, who was riding behind the seeder with his dad, fell and got his leg tangled in the chains. He was rushed to Bassano and it was found a broken leg was the extent of his injuries. He is now a patient in the Bassano Hospital. Billy Parker, while helping his dad on Saturday, got run over with the packer, and we understand that Billy suffered a badly cut face. On Friday Baker Todd, while driving in a wagon, the team ran away, crashing into a telephone pole. Beyond a severe shaking up no one was any worse except the telephone pole.

Some Chancellor folks journeyed to Hussar to see a picture show last Saturday night. This picture was "Mother Machine." They enjoyed the program. While in the show some sneak thief emptied the gas tanks on their cars and let them even enough gas to take them home. This is indeed annoying, and perhaps it might pay the Hussar folk to take a hint and appoint a town constable to be around on Saturday evenings. One car was emptied of nearly seven gallons of gasoline, and though, as a rule he is a pretty even tempered sort of fellow, he sure was mad when left gasless. He wishes he had caught the thief. He says he would have blown him to heaven with the stolen gas. Maybe he didn't say heaven, but we take it that he meant heaven, so those gas thieves had better watch out for the postmaster has some fine plans made to catch them.

Seeding is just about completed in and around Chancellor, and everyone reports ideal conditions. The fields cut with the combine last fall are all stubble burned, and every one sure got a fine burn on such fields.

Mrs. Jan Johnston was in Calgary over the week-end.

V. Hogan was a visitor to Calgary on Sunday.

Harry Becker is down with an attack of the mumps.

Miss Gladys Hunter is visiting in Hussar with Miss Lillian Clifford. Dr. and Mrs. A. G. Scott and Mr. and Mrs. W. E. Sandbrook motored to Calgary Monday evening.

A. Griffin, C.P.R., D.N.R. chief at Brooks, was in Bassano Wednesday on company business.

G. H. Goodenham, Indian agent at Gleichen, was in Bassano on Wednesday.

Jack Napier, of Vancouver, is visiting in Bassano, the guest of his aunt, Mrs. J. H. Donaldson.

Carrie & Milroy, Ltd., received a carton of new Chrysler Plymouth cars on Tuesday. They are all closed models.

Tommy Sutherland the wheel king, was in from Majorville on Monday. He says crop prospects look very good in that district.

C. H. McMillan, Bank of Commerce manager, purchased a new Pontiac coach from Harvey Smith, local dealer.

"Are You a Mason?" will be presented by the Bassano Players in the Masonic Community Hall Friday evening of next week, May 17th.

Next Wednesday, May 16th, is the first half holiday of the summer season. Stores will close on that day at 1:00 o'clock.

Ben Gray was in from Gen Colony on Monday. He says crop prospects in the Colony is coming along in fine shape.

The tree planting crew did some fine work last Monday. There appeared to be no lack of willing workers.

W. J. Redmond has moved into the house recently vacated by T. H. Lawrie, next door to Dr. A. P. D. Silva.

Robt. Scott, provincial government wild lands inspector, is back from Edmonton where he spent the winter. Mr. Scott will be working around Brooks and Bassano again this summer.

Marion Haynes will this summer act as relief agent on the staff of the Alberta Government vendor stores. He expects to be sent to Peace River, Grande Prairie, and many other towns throughout the province.

FOR SALE—Ford Touring car, in good running order, enquire of Mrs. J. H. Brewer, Bassano. 43-44-p

FOUND—A brown and white dog, pointer; appears to be valuable animal. J. Fraser, Bassano Dam. 44-46-p

FOR SALE—Household furniture; apply to M. I. Bunday, Ogilvie elevator, Bassano. 43-44-p

EXPERT MARCHELINO. Mrs. M. I. Bunday, Bassano.

Benyon Farmer Hunts Coyotes In Ford

Hugged Thirty-five Animals in the Bassano District

(Drumheller Mail)

When Henry Ford designed the new Model A, it was considered that the strength jokes relative to Lizzie and her novel features would disappear, but apparently the man who owns one continues to expect it. Lizzie both to remain as undignified as her older sister.

It is doubtful whether the irresponsible Lizzie ever intentionally went big game hunting but, according to Martin Anderson, of Beynon, the new Model A touring which he bought last fall, killed thirty-five coyotes during the winter. Mr. Anderson chased the animals over the prairie in the vicinity of Bassano with his car and succeeded in bagging thirty-five coyotes without using guns or dogs. He stated that the animals circled until almost exhausted and then followed a straight route, making it comparatively easy to manoeuvre the car. In addition the owner of the Ford got an additional thirty-one animals by using hounds, which he transported in the back seat of his touring car.

As coyote skins fetch from \$14 to \$20 each, Mr. Anderson more than paid for his Ford. The only damage to his car was a broken spring when the Ford failed to take an irrigation ditch in the regulation manner.

"Are You A Mason?"

Presented by the Bassano Players
Under auspices of the Masonic Community Hall Committee
By special arrangement with Samuel French of New York

Masonic Community Hall, Bassano

Friday, May 17th

At 8.30 p. m. sharp

Cast of Characters

GEORGE FISHER, stock broker, formerly actor	Mr. W. King
FRANK PERRY, his friend	Mr. W. Hogan
AMOS BLOODGOOD, of Rockford, Ill. Perry's father-in-law	Mr. A. G. Bond
JOHN HALTON, a gentleman farmer from up state	Mr. L. Newby
HAMILTON THAVERS, doorman at a cabaret	Mr. J. R. Donaldson
REINHOLD MORRISON, a young architect	Mr. W. J. Redmond
POLICEMAN	Mr. H. H. Becker
Mrs. CAROLINE BLOODGOOD	Mrs. C. D. Fulton
EVA, (Mrs. Perry)	Mrs. W. J. Redmond
ANNIE	her daughters
LULU	Miss I. Magee
Mrs. HALTON, Halton's wife	Miss E. McArthur
LOTTIE, cook to the Perrys	Mrs. R. W. McFarlane
FANCHON ARMITAGE, a cloak model at Mme. Jolivet's	Miss I. Magee

Now
These good USED CARS must go
Look 'em over

JUST when we think our stock of Used Cars is away down . . . in comes a lot more, taken in on the Spring deliveries of Outstanding Chevrolet. And they are certainly the finest, smartest bunch of used cars we've seen in many a long day. But . . . good as they are . . . they have to go. And when you look over the cars and see the prices you'll realize they will go fast.

Come in tonight. Or as soon as you can. This chance to save dollars on a REALLY GOOD car is too unusual to miss.

1926 Jewett Sedan	\$650.00
1926 Chevrolet Touring	\$325.00
1927 Ford Roadster	\$225.00
1927 Chevrolet Sedan	\$550.00
1928 Imperial Sedan	\$900.00

WORLD HAPPENINGS BRIEFLY TOLD

The government proposes to create a national park in Manitoba, it will be in the Riding Mountains and will embrace 1,000,000 acres.

After half a century as sergeant-at-arms in the Manitoba legislature, John McDougall, 83, died April 30, at his home at Lockport, Minn.

The king ordered conferred General Danvers Booth, deposed commander-in-chief of the Salvation Army, the Order of Companion of Honour.

When the Ashburton-Webster treaty was signed eighty-seven years ago, a plaque was unveiled recently by Kinship International as a memorial to the friendship between Canada and the United States.

Iyemasa Tokugawa, former councillor of the Japanese embassy at London, and grandson of the last of the Tokugawa shoguns, has been appointed to the newly created post of minister of the Japanese Empire in Canada.

A shipment of \$8,000,000 of gold from Germany arrived recently at New York on the liner "Hindenburg." Since March when the present movement of gold started, \$3,923,000 of the metal has been sent from Berlin to New York.

Professor J. B. Raskville, of the University of Alberta, Edmonton, is the newly chosen president of the Canadian Society of Technical Agriculturists. The officers for 1929-30 take over their duties at the annual convention to be held in Winnipeg in June.

Influence Was For Good

Late Marshal Foch Was Exceptional Man In Every Way

The influence and charm of Marshal Foch have been illustrated in many ways. During a crisis in the war, M. Clemenceau, then premier, went to the front to see the distinguished soldier. When the "Tiger" reached headquarters he was told by a staff officer that the marshal was at mass, but, if it was a matter of special importance, the marshal might be disturbed. "Yes, no," was the response of M. Clemenceau. "Don't disturb him. It has carried him through very, very well so far." Early in 1918, during a very grave period, the Methodist council in London, passed a resolution to send a telegram to Marshal Foch with the words, "We pray for you." The telegram was sent, but no reply was received. After the Armistice, Foch, in conversation with an English statesman, replied to him that one of the things which had moved him most in the war was the receipt of a remarkable telegram from the Methodist council of England were praying for him—London Morning Post.

A Young Linguist

George Grundy, 4, of Vador, Wash., is a linguist of ability. He speaks English or Chinook with equal facility. He was born in America, but his parents came from Dalmatia. He reads the letters of the alphabet in both English and Chinook, and can count to 20 in both languages and converse freely.

Many Varieties of Beans

Although most of us know only two varieties of beans by sight, there are numerous others. The following is a list of some of them: Black, white, kidney, navy, lima, pinto, mung, soy, adzuki, garbanzo, fava, broad, and runner.

Don't See Love, Sir?

"Rubish. Take the water away, and what remains? Nothing!"—Nagel's London Mail, Berlin.

W. M. U. 1724

Paint Pointers

In finishing wood it is important that the groundwork be sandpapered and thoroughly dusted off before the next coat is applied. Dusting is indispensable to good workmanship, particularly in the case of woodwork, furniture and automobiles, where a high gloss is the aim of the finisher, and this holds good whether the work is to be finished in varnish, enamel, color wash, or even in a high gloss oil paint. Without the dusting, even when other conditions are perfect, work will present a blotchy, dirty, blotchy, and sticky appearance, and the higher gloss in the finishing product, the more this condition will be reflected. "Dusting off" does not mean that the dust is to be scattered from any given surface with a rag or anything that comes handy. It simply means that soft bristle, painter's duster is to be used and that the dust is not only to be removed from the surface upon treatment, but also from every thing in close proximity to the scene of operation.

In the application of paint to ironwork, the first thing to be done is to get the surface absolutely free from rust. A mere scratch with a knife will seldom be sufficient; a good scrubbing with a wire scratch brush is more effective. The success of varnishing does not depend altogether on the quality of the varnish itself. The condition and quality of the surface to be painted is more important, but the most important are cleanliness of brushes and surroundings, and a warm temperature.

The first coat on new plaster should be very thin in order that the paint may penetrate and harden the surface as well as form a key. The following coat. Abundance of time should be allowed between each coat.

Spill, curled up shingles, even when re-stained or painted, represent a depreciation far in excess of the cost of periodical painting.

The easiest and quickest way to stir up a can of paint is to pour off the liquid from the top, stir up the pigment with a fairly wide paddle, then pour back the liquid gradually, stirring well with a circular and upward motion. The paddle, for perfect mixing, complete the operation by pouring the paint back and forth, several times, from one container into another.

It is always best to bed ash, because it very seldom happens that glass is perfectly level on its flat side, hence does not lay flat. The wood. The bedding putty should be soft enough to run freely from under the thumb.

Whenever possible, shingles, for at least three-quarters of their length, should be dipped in a vat of stains. If the stain is to be a finishing coat applied with a brush.

Duster brushes should be washed with soap and water before being used on white woodwork, otherwise they are apt to discolor the purity of the ground.

Chamois skins for finishing work should never be thrown on the floor nor allowed to come in contact with gritty substances.

Raw linseed oil and turpentine, mixed, is an infinitely better medium than water for keeping brushes soft.

Spots of flat wall paint from ceilings or walls should never be allowed to dry on the woodwork. They should be wiped off at the end of the day, and the wood, and again at the end of the day, with a rag soaked in turpentine. A little linseed oil in this way will save hours of hard work in the finishing of the doors and woodwork.

The time allowed for drying between coats depends on conditions of temperature, ventilation and surface. This does not mean that a paint manufacturer who declares on his label that forty-eight hours should elapse between coats is merely guessing. Not at all. The product has undoubtedly been tested and manufactured to act on this time schedule under fair conditions, but unfortunately, it is likely to be applied under conditions that are decidedly unfair—such as a cold room, no ventilation, greasy or smoky surface—and in such cases the scheduled time of forty-eight hours elapses as poor as value as a reliable guide. As a matter of fact the correct time lapse might be half a day, or even less. When the preceding coat is so dry that there is absolutely no suspicion

of "tackiness" under a firm pressure of the fingers or hand, the second may be safely applied.

Painting New Wooden Buildings

A satisfactory priming coat is prepared by mixing five gallons of pure raw linseed oil with each hundred pounds of white lead, together with one-half gallon of turpentine and one quart of turpentine dryer. Many painters prefer to use for the priming coat some of the ready mixed paint which is selected for the painting of the house. Where this is done, a lighter shade than that which is to be used for a finishing coat, either for trim or body, should be chosen. To each gallon of the paint add one gallon of pure raw linseed oil.

One gallon of paint reduced in this manner, making two gallons or primer, will cover from 800 to 1,000 feet of surface, depending upon the absorbent character of the surface.

The primer for tin or galvanized gutters and pipes should be somewhat heavier. One-half the above quantity of pure linseed oil to a gallon of paint is sufficient. A special galvanized iron primer is still better, for the reason that ordinary paint will not properly cling to galvanized iron owing to certain processes used in galvanizing.

Do not use a cheap priming coat. The employment of cheap oil mixed with a poor grade of linseed oil for the priming coat will invariably lead to trouble. Such a primer will not stick to the wood and even though the succeeding coats are of good quality, they are likely to blister and crack off, thus bringing the good name of the finishing paint unjustly into disrepute. A poor primer, among the costliest of investments.

Putty is to be used as filler for cracks and nail holes. After the priming coat has dried, a small amount of white lead mixed with putty for extra work makes a cement that wears like iron. It is especially useful around skylights where conditions are particularly exacting.

New buildings should always be given three coats, including the priming coat already described. If fewer coats are used there is always a temptation to make the priming coat too thick, which is most undesirable. A thick priming coat will not penetrate into the pores of the wood and possesses very little elasticity. It is almost sure to crack and peel off.

The second coat of paint is applied after the priming coat has thoroughly dried. It is prepared by adding to each gallon of paint approximately two or three pints of pure raw linseed oil and a half-pint of turpentine. The actual amount of reducer is determined by the shade of the paint, more reducer being possible for dark stains than for light. Turpentine is used in this case for the reason that it reduces the hard gloss of the surface and thus makes a base to which the first, or finishing coat, will stick. It is well to remember, also, that the second coat should be "brushed out" well in order to obtain that elasticity in both of the under-coats which makes for permanency.

The third or final coat of paint should be put on just as it comes from the can. Like each of the other coats, it should be "put on thick and brushed out thin," as a time-honored painter's maxim expresses it.

In order to secure the lozenge-shaped covering which is bound firmly to the wood and which endures for years.

Repairing Wooden Buildings

It is always good policy to re-paint a building before the previous coat has fallen into a bad state. If the work is done while the old coat is in good condition and the same value of paint is used ("value" referring not to color but to the paint's degree of lightness or darkness), one coat is usually sufficient when a good house paint is employed.

If, however, the old coat has been permitted to fall into a state of decay, it will be necessary, in order to put the surface into good condition, to use two and sometimes even three coats of paint.

If, owing to the use of a cheap oil primer, or because the previous painting was applied on damp wood, or because of any other malpractice, the old coat has become hopelessly blistered and is peeling, the only safe course is to remove it entirely. If this is not done, the new coat will never properly adhere. The materials may be, and no matter how excellently you may have done the work, will be lifted off by the continued peeling and cracking of the old under-coat.

The best way to remove paint from large surfaces is to burn it off with a blow torch. This method consists in softening the paint with intense heat, generated by the torch, and scraping it off while hot with a metal scraper. It is advisable to employ an experienced man for this work.

After the old coat has been entirely removed and the surface of the wood sand-papered and dusted off in the usual way, the building should be painted in the same manner as directed for new wooden buildings.

Usually an old coat which is in fair condition may be merely treated with a coarse wire brush and scraper in order to remove the few loose particles adhering to the surface. The paint should be dusted off and given two coats of paint.

The first coat is prepared in the following manner: If the surface seems unusually porous, a half-gallon of pure raw linseed oil and a pint of turpentine should be added to each gallon of paint. If the surface is hard and smooth, the oil should be added a pint of turpentine to a gallon of paint.

The second coat of paint should be applied as it comes from the can. Both these coats should be applied with the same care as is given to a new building, and the general directions for painting new wooden buildings should be re-read and followed.

Staining Shingle Roofs

Use a good shingle stain. Before beginning the work, see that the shingles are dry and clean. As a matter of economy it is better to let shingles lie in bulk before staining them. Do this in and out as quickly as possible and wipe them off by rubbing across a stick covered with kumput. Then allow them to drain off in a drip trough. They should be stained for only about two-thirds of their length. Stain the exposed ends only.

Paint is best for old, weather-beaten shingles, blackened by age and exposure. The priming coat should be prepared as directed for house painting and should be brushed out with careful attention to the ends of the shingles. The second and finishing coat should be applied as it comes from the can.

MESSAGE TO NAVIGATION

The annual message of floating icebergs is being sent as usual with the dispatch of Watchful Little Coast Guard cutter. These patrol ships and when a watch is located flash searchlights and send out radio warnings. The icebergs are huge, for only one-third is visible above the waves.

Choosing Upholstery and Drapery Fabrics

There is a far wider range of choice in upholstery materials than is generally utilized. Selections of serviceable and attractive materials are not limited to the tapestries, velvets and velvets in which stock pieces of over-stuffed furniture are usually found in the shops.

The following fabrics are suggested for upholstery purposes:

Wool Mops. This is a material which comes in 50-inch width in a selection of staple colors. It is serviceable and inexpensive.

Corduroy. Upholstery corduroy is material that should be used far more widely than it is at present for upholstery purposes. It is attractive, inexpensive and durable.

Cretones, Printed Linens and Printed Mohairs. Cretones, printed linens and printed mohairs are highly decorative upholstery materials.

Monks Cloth and Denim. These are cotton materials which are attractive and give good service. They are excellent for recovering old pieces of over-stuffed furniture where expense is an item.

Cretones are universally popular for draperies, and not without reason. They are light, cleanly and colorful and can be purchased in a very wide selection of designs, colorings and prices. In living rooms and dining rooms, stronger or richer colorings and heavier or more formal designs are preferable to the more delicate floral patterns suitable for bedrooms.

For the living rooms of classic restraint and both bold and restrained floral patterns, provide the characteristic decorative note for Queen Anne furniture.

Crude cretonne is to be avoided, but the other extreme of fancy cretonne is usually well guarded against. Conventionalized designs in striking decorative effects are less lacking than the regular cretonne patterns. The latter are flowers in an all-over design are not as distinctive as fanciful floral types on a broken background.

Floor Coverings

Next to the walls and ceiling, the floor presents the largest area in the room, and consequently its covering should be well thought out and carefully selected.

The floor, as well as the ceiling, is a plane which holds the four walls of the room together. While the walls form the background for furnishings, the floor is the foundation. A good foundation is always essential to any well-designed decorative plan.

Linoleum floors are attractive, resilient, shock-absorbing, durable, warm in winter and cool in summer. Waxed linoleum gives it a soft, smoother texture and preserves it indefinitely.

For the average room, a rug, with a plain ground and of neat border, or neat all-over pattern of floor covering, is more desirable than one with a decided pattern.

Large and bold patterns have a decided tendency to make the room look smaller. The patterns are apt to jump into the line of the floor covering, the foundation for furnishings. It must be made to keep its place on the floor. When there is a great deal of furniture, a boldly figured floor covering gives a confused appearance to the room and destroys its restful, harmonious appearance.

Boldly patterned rugs usually come in strong colorings, and this also makes them exceedingly difficult to fit into a soft, harmonious color scheme.

Figured floor coverings, however, have their place. In rooms which are sparsely furnished or where the furniture is of a light and simple type, they add to the "furnished" appearance of the room. That is, they take care of the room.

Preserving And Laying Linoleum

The ideal method of laying linoleum is to cement it over a wooden felt paper, which should first be pasted to the floor with any standard make of linoleum paste. This overcoats the floor and prevents the edges of the linoleum from coming bulging and stretching, or opening up at seams and cracks along the edges. It also prevents water from getting underneath the linoleum and in that way prolongs the life of the flooring.

Linoleum laid in this manner becomes a solid, permanent, elastic floor; it cannot bulge or stretch. This felt paper foundation absorbs all expansion of contraction that they take place in the wood floor and makes the linoleum most durable. It also allows the linoleum to be removed without difficulty or damage should the necessity arise.

The most approved manner of treating linoleum has been found to be waxing. The waxing is done by rubbing on and the floor polished like hardwood. An occasional treatment of this kind will keep the linoleum in an immaculate condition.

A damp cloth removes all soil from the waxed linoleum and it will be found that scrubbing is entirely unnecessary.

In case there should be obstinate marks of soil on waxed linoleum, they can be removed with a pad of fine steel wool without scratching or damaging the linoleum itself.

Varnishing is best for printed linoleum, as it brightens and preserves the original pattern and makes the linoleum easier to clean. A coat of good varnish or white shellac will also preserve carpet.

Varnishing is best for printed linoleum, as it brightens and preserves the original pattern and makes the linoleum easier to clean. A coat of good varnish or white shellac will also preserve carpet.

Many people two hours after each meal, the matter indicates as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It was formulated for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

THE CRIMSON WEST

CHAPTER XVII.—Continued

The rush of waters continued high in the air as wild ducks passed in swift flight on their yearly pilgrimage to the north. Occasionally a flock would lower in gradually narrowing circles to land with a splash in the refulgent waters of the lake. Then they would rise, the white bobbing their tired wings, and the quacking contentedly. Flocks of geese passed in wedge-shaped formations, their honking coming faintly from a dizzy height. A flock of Arctic owls, skimming as low as the crisp rattle of their wings could be heard, landed in the centre of the lake with a great commotion. There with their beautiful necks proudly arched they floated like white ghosts throughout the night. The red and yellow leaves, like gaudy carolers dripped the decedent trees. The wild crab-apple and high-bush cranberry hung frozen on the naked branches. The sun was surrounded by a ring and shone weakly through a misty haze. The unmistakable breath of the north wind was in the air.

"Old John took his traps down from the left and sailed them. A patch was found needed to a worn moccasin, and new laces were inserted in his moccasins. "Winter's come", of times, and we're going to have a heavy fall of snow," he mused to himself. For two days Nature gave warning. Then on the second night the storm came. A roaring wind came howling from the north, lashing the waters of the lake to foam, tearing at Donald's cabin with the strength of invisible giant hands, and howling through the forest with shrieking wails. Gusts came upon gust with increasing strength, and in the short lulls could be heard the swish of the sleety snow against the windows.

The big trees creaked as they swayed in the gale, and with a loud groan, as if in mortal pain, a huge forest monarch, as its roots gave way, fell crashing down the smaller trees.

"Winter's come", of times, and we're going to have a heavy fall of snow," he mused to himself. For two days Nature gave warning. Then on the second night the storm came. "You will never see cruise methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do 'just-for your own sake'—now."

He sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—easy directions.

treasures to smile the earth with a resounding crash.

The wind went down through the night, but the snow fell steadily. When Donald opened his door next morning he looked out on a new world. The wintry of frost and snow had given the earth a blanket of white that was eye-blinking in its brilliancy under the bright morning sun. The keen frost had locked the lake light under a coating of clear ice.

CHAPTER XIX.

With a fond hope that he would receive word of the Wainwrights, Donald eagerly awaited the coming of each mail; but after a month of disappointment he became less sanguine, and threw himself desperately to his work in a vain attempt to ally his heartache.

During the long winter the mail continued operations in spite of heavy snow, but the roads being kept open by the coal-train.

Janet came twice with gay parties to enjoy the skiing and snowshoeing. She found that she loved Donald, and decided that any uncertainty as to his past was as nothing when compared against her need of him.

Elitely she reproached herself for allowing her pride to estrange him from her, and with all the arts of a beautiful and cultured woman she sought to regain the power she once held over him.

On one occasion, when Janet mentioned his "wood-sprite," she saw a rust-bloom on his eyes and caught his breath sharply. The very thought of her when she stabbed her like a knife.

With the coming of March a change came over the earth. The snow melted, and reluctantly bowed his head. Gentle showers and warm winds from the south honey-combed the ice on the lake, moccasins fled away, and the frost-bound soil gave forth earthy odours to replace the keen smell of the snow.

One morning a song sparrow under Donald's window sent out its sweet chirp—chip-chip-char-char-was-was. And from the top of a swaying alder were carried his joy of living in full-throated tones that said that spring was here. Stirred by the warmth and cheery buzz, the frost came from the mud, where they had lain dormant all winter, and with swelling throats and bulging cheeks went out their cheerful "Kic-un, k'munk."

Mist covered the lake, and in an open spot near the mouth of the creek a flock of ducks departed themselves happily. The sun grew higher with every dawn, gaining strength each day until its warming rays spread the beauty of colour and fragrance over all.

One afternoon, when the air pulsed with the song of birds, and newly-opened buds burdened the atmosphere with perfume, Donald walked up the hill to Wainwright's cabin.

Scores of birds, returned from their yearly pilgrimage to the north, flitted about the deserted buildings, but not one was golden-haired girl with a welcoming smile to greet them. Tivulites from the melting snow and gurgling channels in the dense nestly kept plots of wild flowers, and the roof of one of the smaller birds had fallen in.

Donald pushed open the door of the plain building and entered. The air felt chill and dank. He experienced a quick depression of spirits, and his heart ached as he surveyed the gloomy interior. He shivered as a pack-rat scuttled across the floor and disappeared under Cecilia's bench.

With a heavy heart he returned to the bright sunshine, sat down, and gave himself over to a period of indolently retrospection.

His mind went back to his first meeting with Connie, then on through the many thrilling episodes of the summer, the belated high mountains, to deep forest glades, to companionship with the birds, flowers and trees of God's wild outdoors.

she would never be content with the bad air and the cramped conventions of cities. Little suddenly remembered the words she had said when they met by the stream near her nest for the first time. "I seemed to hear her sweet, haunting voice with its pleasant, dreamy sound."

"And," he had said, "six months out of every year I'll come right here and live in these mountains."

"You'll come back," he said aloud. The thought cheered him. "You'll come back," he repeated to Andy that night.

"I'll be home," he said.

A week later, Robert Renne, accompanied by his daughter, arrived at Summit Lake. The owner of the mill, he said, as he placed a hand in friendly fashion on Donald's arm. "The mill is a success—a huge success—and I know who deserves the greater share of the credit!" He smiled up at Donald. "Next week," he went on, "an event of importance will occur in the history of the Government is to ascertain if the chief forester called at my office to the party of Eastern lumbermen I will tell me that this mill had been selected as the most modern and efficient in the Province, and requested permission to bring the Government's agents here."

"They are to stay here a few days," he said, "but I am incensed as the train will be equipped with dining and sleeping-cars, based for the occasion by the C.P.R. I will not let you to arrange for their entertainment and to see that everything in tip-top shape for their arrival."

Robert Renne was leaving the next morning he turned to Donald. "By the way," he said casually, "I have decided to add a yearly bonus to my salary, based on the profits of this mill. I have made it retroactive from the time you took charge." Before Donald had time to express his thanks his employer swung about the train.

Expressing a desire to be at the lake on the arrival of the excursion, Janet set.

On the day set for the visit of the Eastern capitalists the sun rose in radiant promise of a typical June day. The leaves were now fully matured, and the willows and maples rustled under the soft warm winds. All the valley was clothed in a verdant, quivering, gently pulsating life. The forest but a few minutes into the depot. Its occupants poured out until the small platform was filled to overflowing. Robert Renne, accompanied by a slender man dressed in a tweed suit and cap, pushed his way through the crowd to Donald's side. Donald greeted his employer with a glance casually at Mr. Renne's companion. His eyes widened. "Mr. Wainwright!" he gasped.

Wainwright laughed happily as he swung Donald's hand.

"Is—is—Miss Wainwright with you?" stuttered Donald.

Then he saw her.

Task For the Soviets
Suppressing Holy Men Of Russia Would Not Be Easy

If the Soviet Government really means to try to suppress the "holy men" who wander about in Russia it will be up against as hard a task as it has encountered yet, writes "Looker-on" in the London Daily Chronicle. These local saints or "aiders," as they are called, have great influence, not only on such highly-placed people as bishops, Rasputin, but on the mass of peasants. The Russian villages are foraging-lands for superstition, and the "aiders" make the most of the fact. Some of them are genuine, too, and preach with the fervor of Jewish messianic prophets.

GOOD IN EVERY WAY
Baby's Own Tablets Banish Babyhood and Childhood Alliments

A medicine that all mothers praise—one good in every way—one that will quickly banish the minor ills of babyhood and childhood is the medicine to keep in the medicine chest. In always have on hand in case of emergency. Such a medicine, Baby's Own Tablets—they are helpful at all times. They are a safe, but thorough laxative which by regulating the bowels and stomach banishes colds and simple fevers; corrects constipation and indigestion; relieves colic and diarrhoea and makes the cutting of teeth easy.

Thousands of mothers use no other medicine for their little ones. Among them is Mrs. J. H. Bromley, West-mouth, Ont. who writes:—"I have four children and whenever any of them is ill I always use Baby's Own Tablets and have found them good in every way. I would not be without the Tablets and would also like your little booklet 'Care of the Baby in Health and Sickness.'"

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Recipes For This Week
(By Betty Barclay)

STUFFED LAMB CHOPS
10 chops.
1 tablespoon butter.
1 tablespoon chopped onion.
1/2 cup chopped mushrooms.
1 teaspoon salt.
Pinch of pepper.
1 tablespoon flour.
2 tablespoons oil.

Trim the fat off the very thick with sharp knife. Split each chop carefully not to separate the meat from the bone. Put butter in a pan and add the onion, cook slowly for five minutes, then add the mushrooms, salt and pepper and cook five minutes more. Add the oil and stir. Stuff each chop with this mixture before it cooks. Press each lightly to the bone and broil for 10 minutes. Unavailable, bread dressing may be used, using a greater quantity of stock.

EGYPTIAN DELIGHT SALAD
Flake one can salmon, and mix with one cup diced celery. Mix thoroughly with the dressing. Dressing: 1/2 cup lettuce leaves on top plate so that they reach out to the edge of the plate. In the centre heap the salmon mixture. Press lightly into the sides one dozen stuffed olives, having the red end outside. Arrange around the edge two or three tomato slices with a ball of cottage cheese (moistened with salad dressing) in centre of each. Between each slice of tomato place a small radish with its green stem upwards.

Everything in a Name
People Of Importance Usually Get What They Want

Recognition or active officers when, dressed in plain clothes is a matter which frequently gives trouble to the bank and life in the services. The same difficulty arises in the Metropolitan police, where a good story is told of Lord Byng visiting a suburban station shortly after his appointment. The door was guarded by a purser officer. "Can I come in?" asked the chief commissioner. "I don't think so," replied the officer. The purser is out. "Well, can you send for him?" "Yes, if his important. What name shall I give?" "Byng." The purser that followed dispelled any doubt about the query "What's in a name?"

Scientist Makes New Discovery
Says Milk Treated By Wireless Waves Sweeter For Weeks

An Austrian scientist claims to have discovered a method by which milk treated by wireless waves of short length can be kept sweet for three or four weeks. The new "wireless milk" is produced by passing an intense beam of short waves through the liquid. This is said to kill all germs which cause milk to turn. The milk itself is not heated by the treatment, and does not acquire a "cooked" taste.

High Price For Canadian Lambs
A flock of 820 winter fed lambs, shipped to an eastern market recently by Albert Green, farmer at Taber, Alberta, were sold for a total of \$12,000, or 17 cents per pound. Other shipments of Western Canadian lambs are to be made to markets in the East where, it is reported, they are in demand.

A Costly Gift
The wedding present of the City of Stockholm to Princess Marika of Sweden when she married Crown Prince Olaf, of Norway, was a diamond tiara set with 956 stones.

Aching Feet
Swollen and sore from a day's strenuous work can be soothed by Minard's. But a hot warm water solution.

Canoeing in British Columbia
Large Scale Fertilizer Industry To Supply The Needs Of Prairie Farmers

"Substantial fortunes are awaiting the prospectors who unearth some of the potash believed to be stored away in the mountains of British Columbia," said George H. Kilburn, of the Consolidated Mining and Smelting Corporation, which is working out a large-scale fertilizer industry at Trail to supply the needs of the Prairie Provinces. Mr. Kilburn mentioned that the company is making first analysis of potash specimens submitted so as to assist prospectors.

Local News

The C. P. R. is rebuilding their wire line through Bassano, setting in new poles and straining much new wire.

Wm. Cathers, son of Mr. and Mrs. D. Cathers, is home on his holidays.

Andy Jacobson is remodeling the old Lethbridge Brewery building for a storage garage. This building is next door to the creamery.

The W. I. held their regular meeting last Tuesday. Mrs. Shearer, who is visiting with Mrs. Hoffmann, gave an interesting talk on Alaska and the Klondike. Mrs. F. Gayford was chosen as delegate to attend the convention in Edmonton May 28th to 31st. The next meeting of the W. I. will be held Tuesday afternoon, May 21st, in the Oddfellows' Hall.

Next Sunday, May 12th, is Mother's Day.

A son was born to Mr. and Mrs. Clint Marquess on Sunday, May 5.

NEW POOL ELEVATORS

Between March 22nd and May 6th this year the Alberta Wheat Pool has purchased 22 local elevators and has 41 new elevators under construction. The new elevators being built are 35,000 and 40,000 bushels capacity, and the majority of those purchased are of 20,000 bushels capacity. The addition of these houses brings the total elevators owned by the Alberta Pool to 381.

Elevators have been purchased at the following points: Acheson, Bardo, Bassano, Boyle, Crowsnest, Chiswick, Coats, Hayman, Hazelton, Lacombe, Lonsdale, Midnapore, O'Brien, Orton, Stirling, Spring Coulee, Spruce Grove, Stubby, Warburg, Whitham, Villeneuve.

Elevators are being built at the following points: Alton, Athabasca, Balzac, Barrow, Bennett, Bittern Lake, Brooks, Hayman, Hazelton, Lacombe, Lonsdale, Midnapore, O'Brien, Orton, Stirling, Spring Coulee, Spruce Grove, Stubby, Warburg, Whitham, Villeneuve.

WHEAT POOL NEWS

The Alberta Wheat Pool reports that the increase in membership during the first four months of 1929 was greater than during any similar period in the history of the Alberta Pool.

The false report of the resignation of A. J. McPherson, president of the Canadian Wheat Pool, and Geo. McEvoy, general sales manager, was circulated all over the world. Liverpool and Argentine cables contained rumors of trouble in the pool ranks resulted in a weakened market.

Alberta Wheat Pool has made preparations for the holding of the annual nomination and election of delegates. The membership each year chooses from among its members 70 delegates to direct the policies of the pool. Nominees for that position must live in the sub-district in which they are nominated, must be directly connected with wheat producing, and must have the names of ten members resident in the sub-district on the nomination paper. Nominations must be in and office by June 26th.

The appeal of H. W. Keay from the judgment of the supreme court of Alberta which dismissed his suit against the Alberta Wheat Pool, was heard before the Supreme Court of Canada, and judgment was reversed.

Alberta Pool elevators are having their spring clean-up. The management has instructed local agents to see that the elevator property and surroundings are put in spick-and-span condition.

TENNIS NOTES

The club house was moved last Monday afternoon, and is now located on the west side of the courts. The fence is to be altered here to provide more room for benches. Many players have been enjoying the game during the past week, but the courts are not in first class condition. They will be improved, however, as soon as the weather can be turned on without danger of freezing and bursting the pipes.

KNOX PRESBYTERIAN CHURCH
Rev. P. C. McCrear, minister

Sunday, May 12th, 1929
